

Software update

What's in this box?

This software installer kit can be delivered with the following content based on the needs of your company.

Software installer kit (USB-BLACK)

This USB contains software setup and updates as well as our e-learning content.

Ocean Company Specific Content (USB-BLUE)

This USB contains company specific e-learning content.

Miscellaneous Content (USB-YELLOW)

This USB contains optional tools and content.

Ocean Recovery Kit (USB-RED)

This USB is used to restore training computers delivered by Ocean Technologies Group.

Important!

Store this box with its USBs in a safe place. You might need it later for installation of additional e-learning content.

Do you need help?

You can find answers to most of your questions in the help section of the software.

If you still need help, our global support team are standing by to answer to answer questions and provide assistance to resolve any problems you may encounter.

Email: support@oceanntg.com

1. Why do you need to update?

To ensure that you are equipped with the newest training content you have received this update. It contains new and revised e-learning modules and updates to the software. Follow these introductions to get up to date on your training content.

2. System requirements for Ocean Learning Platform

Operating system

- Windows 10
- Windows Server 2012
- Windows Server 2012 R2
- Windows Server 2016
- Windows Server 2019

All client OS that is at least Pro or Business edition is supported. Home, Education editions are not supported.

All server OS that is at least Standard Edition is supported. Essential and Foundation editions are not supported.

RAM

- Minimum 1GB RAM
- Recommended 2GB RAM or more

Storage

Storage space usage will vary depending on your selections in point nr. 3. Complete content installation is approx 160GB.

Please note – Additional disk space should be reserved for increasing SQL database.

CPU

- 32-bit systems
Intel or compatible
minimum 1 Ghz.
- 64-bit systems
minimum 1.4 Ghz.

3. Time to upgrade your software

- Insert the USB-Black in your computer and open the folder. Double click on "Ocean installer" to start the application.
- Follow the onscreen instructions. Take note of the "Choose components" screen. You can select whether to install all e-learning content (select "Complete content") or limit the installation to the modules included in your subscription (select "Scope content").
- Once the installation is completed please generate an export of your latest training results and send it to your company's training address. Within the hour you will receive a reply with an updated configuration file for you to import in Ocean Learning Platform which completes the upgrade.
- If Ocean Company Specific Content (USB-BLUE) has been delivered, install this by running the application "Ocean Training Library" found on the USB.

4. Need more information?

On software installer kit(USB-BLACK)you will find some quick guides to help you get started with your new system. Please go to \quick guides\Ocean Learning Platform and you will find the following Quick Guides:

- Quick guide for onboard administrators
- Quick guide for onboard personnel

5. Using the software on a Network

- When a computer running Ocean Learning Platform is connected to your network, the software can be accessed from other computers through a web browser.
- Open a web browser and enter:

`http://xxx.xxx.xxx.xxx:8080/start/`

Where x is replaced by the server's static IP or host name (e.g `http://123.567.123.456:8080/start/`).
